

All the numbers under the 1 end in 1...
 ...and all of the numbers under the 2 end in 2...
 ...and it's the same for 3, 4, 5, 6, 7, 8, and 9, too.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

And all of the numbers under the 10 end in zero!
 Good! Those numbers under the 10 are important!
 We'll learn those first.
 Can anyone name all of the numbers in this column below the ten?

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

How many can you name?

IN CHARTS, **ROWS** GO LEFT-TO-RIGHT ↔, AND **COLUMNS** (SAY "CALL-UMS") GO UP-AND-DOWN ↓. THINK OF TALL COLUMNS ON OLD BUILDINGS TO HELP YOU REMEMBER. III

I can!

Most of them sound like the numbers they start with...
...and end with a "tee" sound.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

8	9	10	← ten
18	19	20	← twenty
28	29	30	← thirty
38	39	40	← forty
48	49	50	← fifty
58	59	60	← sixty

Below the ten is twenty, then thirty, then forty.

Forty sounds like "four" then "tee."

Next is fifty, then sixty.

Six...
tee!

Great!

70
80
90
100

Grogg, would you like to try to guess the rest?

How would you say each of these numbers?

How do we say 70, 80, 90, and 100?

DON'T WORRY ABOUT SPELLING NUMBERS THE RIGHT WAY FOR NOW, AS LONG AS YOU CAN SAY THEM!

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

...but the pattern breaks when we get to a 1 with two zeros.

Who knows what we call this number?

Hint: It's the name of this section.
