## MEASUREMENT

TRIANGLE CONNECTION
Connect the dots to solve these triangle puzzles.

In a Triangle Connect puzzle, the goal is to find a triangle with the given side lengths.

## EXAMPLE

Trace three of the lines below to make a triangle with sides that are 3,5 , and 7 centimeters long.

We label the lengths of all six lines in centimeters.
Then, we trace the only triangle with sides that are 3,5 , and 7 centimeters long.

The wiggly line by the 4 means that it is about 4 centimeters, but not exactly.

## PRACTICE

For each problem, trace three lines to make a triangle with the side lengths given in centimeters (cm).
50. Sides:
$2 \mathrm{~cm}, 3 \mathrm{~cm}, 4 \mathrm{~cm}$

52. Sides:
$4 \mathrm{~cm}, 5 \mathrm{~cm}, 6 \mathrm{~cm}$

51. Sides:
$4 \mathrm{~cm}, 4 \mathrm{~cm}, 5 \mathrm{~cm}$

## 53. Sides:

$4 \mathrm{~cm}, 4 \mathrm{~cm}, 7 \mathrm{~cm}$

## MEASUREMENT

TRIANGLE CONNECTION

## PRACTICE

For each problem, trace three lines to make a triangle with the side lengths given in centimeters (cm).
54. Sides:
$5 \mathrm{~cm}, 6 \mathrm{~cm}, 8 \mathrm{~cm}$

56. Sides:
$4 \mathrm{~cm}, 6 \mathrm{~cm}, 9 \mathrm{~cm}$

## 55. Sides:

$3 \mathrm{~cm}, 6 \mathrm{~cm}, 7 \mathrm{~cm}$

57. Sides:
$6 \mathrm{~cm}, 7 \mathrm{~cm}, 9 \mathrm{~cm}$

## PRACTICE

For each problem, trace three lines to make a triangle with the side lengths given in centimeters (cm).
58. Sides:
$6 \mathrm{~cm}, 8 \mathrm{~cm}, 10 \mathrm{~cm}$

60. Sides:
$8 \mathrm{~cm}, 8 \mathrm{~cm}, 8 \mathrm{~cm}$

59. Sides:
$5 \mathrm{~cm}, 7 \mathrm{~cm}, 8 \mathrm{~cm}$

61. Sides:
$5 \mathrm{~cm}, 6 \mathrm{~cm}, 7 \mathrm{~cm}$
